

Job Title: Machine Learning Engineer

Job Description:

Develop and deploy machine learning systems to enhance product functionality. Focus on model optimization and scalability.

Key Responsibilities:

- Design ML algorithms and pipelines.
- Test and validate model accuracy.
- Integrate models into applications.
- Monitor and maintain ML systems.

Required Skills & Experience:

- Degree in Computer Science or equivalent.
- Knowledge of Python, R, or Scala.
- Experience with ML frameworks (e.g., Scikit-learn).
- Familiarity with data preprocessing.
