

Job Description: Site Reliability Engineer

TechTrend Systems

Posted: September 10, 2025

Job Description

Ensure system reliability and performance through automation and monitoring. Manage infrastructure and support high-availability applications.

Key Responsibilities

- Automate infrastructure provisioning and maintenance.
- Monitor system health and resolve incidents promptly.
- Implement observability tools like Prometheus and Grafana.
- Collaborate with development teams to improve system reliability.

Required Skills & Experience

- Degree in IT, Computer Science, or equivalent.
- Experience with Kubernetes and Docker.
- Proficiency in scripting (e.g., Python, Go).
- Familiarity with monitoring tools and incident response.
